DETAILED ACTION

1. Amendment and response filed by applicants in Paper No. 11 dated Aug. 12, 2003 have been entered and considered carefully.

2. Claims 1-7 have been canceled. Claims 14-26 have been added and claims 8-13 are now dependent on claims 14-26.

The specification has been amended.

Initially, it is pointed out that it is NEW MATTER for the above amendments. Please note that formula III as now amended lacks antecedent basis in the description as originally filed. Especially the term "wherein B, together with D and the two carbons to which D is attached" encompassed limitation or subject matter which was not described within the four corner of the specification as originally filed. Please note that, D and the two carbon to which D is attached are all "saturated" bonds. Therefore, the NEWLY ADDED formula III wherein B, together with D and the two carbons to which D is attached is confusing as to what the structure is. Is it B is mono- or bicyclic aryl together with D which would be i.e. dihydroindolyl ring, or the whole ring is phenyl or???? In so far as the newly added formula III and the originally filed formula III is concerned, the newly described formula III is not identical to the originally filed description or within the scope of the originally filed description but contain additional rings i.e. tricyclic ring (B=bicyclic together with unsaturated –C-B-C-).

Based on the above explanation, if the B-D ring system as now amended will be drawn to <u>only fused ring system</u>, then, applicants have canceled <u>all of the elected invention</u>.

Applicants are advised to limit the claims to the elected invention (see page 2, office action Paper No.9 dated 04/18/03) which has been clearly delineated based on applicants' election.

- 3. The rejections of 1-6 are dropped in view of the cancellation of the claims.
- 4. Claims 8-26 as now amended are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the

Application/Control Number: 10/004,422

Art Unit: 1625

relevant art that the inventors, at the time the application was filed, had possession of the claimed invention. Please note as it was explained supra in section 2, the newly amended fused ring system with "-C-D-C-" being saturated are not described in the specification as originally filed.

Removal of all new matter is required. In re Ressemussen 211 USPQ 325.

5. The amendment filed in Paper No. 11 to the specification is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure as it has been explained supra in section 2.

Applicant is required to cancel the new matter in the reply to this Office Action.

6. Claims 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The notation of "B" is confusing since the capital letter "B" in chemistry is normally referring toe boron and heterocyclic rings can have boron as a ring element.

7. The rejections of claims 1-13 under 35 USC 103(a) over Beight '200 in view of Klein '339 or Klein '339 in view of Beight '200 are applicable to the now amended claims 8-26 and are maintain for reason of record.

Applicants argument is that the limitation of Q and Q' being bond or oxygen and X being C ₁₋₆ alkylene obviated the Beight reference since such linker was not included in the reference. This is erroneous, please note that such teaching is not only generically included in the description, specific examples such as col. 45-46 examples 32-33 explicitly showed the one of Q or Q' is "O", the other is bond and X is methylene structure. The insertion of one methylene between the amido linker and the aminoimino substituted phenyl is taught by Klein '339 as delineated in the previous office action.

The erroneous typographical error in calling the Beight '200 reference Ackman '439 is hereby corrected. Please note that applicants are fully aware of the error since the Beight '200

Art Unit: 1625

reference was clearly named in the rejection and was only referred to erroneously in the explanation.

8. The rejections of claims 9-11 under 35 USC 112 first paragraph for lacking descriptive support for the claimed scope is new applicable to claims 21-26 and is maintained for reason of record. Please note that anticoaglulant can not treat <u>all</u> cardiovascular disorders, i.e. hypertension is a cardiovascular disorder which is not treatable by anticoagulants. The broad scope encompassing "any and all" prodrug for which descriptive and enabling support have not been found in the specification is still in claim 9 or its dependent claims.

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Celia Chang whose telephone number is 703-308-4702. The examiner can normally be reached on Monday through Thursday from 8:30 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner can be reached by facsimile at (703) 308-7922 with courtesy voice message supra.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1235.
